## Exercise

A population change (increase, decrease) depending on 4 factors:

- Immigration and Emigration (net migratory rate)
- Births and Deaths (natural increase/ decrease)

With the help of statistics, try to imagine what is going to happen in the next future with your country. Try to draw different scenarios (positive, negative) combining the 4 variables.

For instance:

COUNTRY	Present	Future	
		Positive scenario	Negative scenario
Immigration			
Emigration			
<b>Net Migration</b>			
Births			
Deaths			
<b>Natural Increase (Decrease)</b>			
<b>Total</b>
